IMPROVE SYDNEY PUBLIC TRANSPORT (ISPUT)

Carlingford Line Extension

Community Benefits and Concerns

- Extension, duplication and upgrade of the Carlingford line to Epping.
- The Carlingford Rail Line Extension will add flexibility into the rail network by freeing up the Southern, East Hills and Western lines and allowing residents from Liverpool a saving of 15 minutes on journeys to the city.
- New underground platforms at Liverpool will provide for both terminating services and connecting services with the southern line.
- Newly constructed underground platforms at Parramatta would link services to the Carlingford line.
- The Carlingford line at Clyde would be elevated so as to pass above the rail maintenance facility and eliminate the level crossing on Parramatta Road
- Rosehill station would be renamed Rosehill Racecourse and configured as a twin island, 4 platform station
- Reduce peak hour traffic congestion
- Above and below ground operation of line
- Improvement of existing rail services
- The car, taxi, bus and coach industries will not be adversely affected by the construction of the Carlingford Rail Line Extension.
- Existing roads become safer to use for motorists and cyclists.
- Road fatalities will be reduced and as a result car insurance premiums will fall.
- Truck drivers and couriers will be able to deliver goods more easily
- New bus and light rail routes will not remove the need to expand and improve the rail network.
- Introduction of a multi-modal charge card for train, bus and ferry travel similar to the E-Toll account or Cab charge card.
- Enable commuters to purchase bus, rail and ferry tickets on the internet.
- Separation of railway line planning from urban planning.
- Financing of this railway will come from public, private and **Railway Bonds**.
- Who loves sitting in stressful peak-hour traffic congestion?
